Tools: Git, GitHub, Postman, Firebase, Cloudinary, Render, Vercel

Projects

FraudSense AI — MERN, MongoDB, Express.js, React.js, Node.js, Python Flask, Machine Learning, JWT, Render

- Built a full-stack fraud detection platform supporting role-based access control, real-time monitoring, fraud analytics, and ML-driven risk prediction.
- Integrated a Python Flask machine learning microservice with the Node.js backend to generate fraud probability scores and identify suspicious transactions.
- Implemented JWT authentication, secure REST APIs, transaction management, fraud alerts, AI-powered insights, and geolocation-based risk visualization.
- Designed responsive dashboards with real-time analytics, severity classification, fraud trend monitoring, and interactive data visualization.
- Live Demo — [GitHub](#)

S.W.A.N. Protocol — MERN, MongoDB, Express.js, Next.js, Firebase, Cloudinary, AI Integration

- Developed and deployed a full-stack environmental monitoring platform for reporting, tracking, and managing pollution incidents.
- Implemented geolocation-based reporting, image uploads using Cloudinary, report lifecycle management, and severity classification workflows.
- Built analytics dashboards featuring environmental insights, interactive visualizations, and incident tracking capabilities.
- Integrated Firebase authentication, role-based access control, and AI-powered incident summarization to enhance reporting efficiency.

Achievements & Problem Solving

- Solved 250+ DSA problems on arrays, strings, linked lists, trees, and recursion.
- Built and deployed full-stack web applications using MERN, Next.js, and cloud services.
- Implemented authentication, analytics dashboards, and AI-powered features in production projects.
- Actively seeking software development internship opportunities.
